titanium

built for the journey. a force on the road. a smooth, quiet ride made possible by a coil-over suspension, tubular frame and the most powerful motor in the evolve lineup. explore the unexpected from highways to winding roads at speeds up to 60 mph. titanium features our exclusive LiFe PO₄ battery, giving it a range of 60 miles and a charge time of under 3 hours. upgrade to titanium xr and get all the features of the titanium with double the range capability – an impressive 100 miles on a single charge.

	titanium	titanium xr
price	\$5,400 *	\$6,900 *
max speed	70 mph	70 mph
range	60 miles**	100 miles**
charge time	2.5 hours	3.5 hours
motor	5000w	5000w
battery	60ah LiFe PO ₄	100ah LiFe PO ₄
brakes	front & rear disc	front & rear disc

* prices are msrp and do not include taxes, tags, freight and prep
** range dependent on driving factors such as speed and weight

for more photos, visit our online gallery at
www.evolve motorcycles.com

-  front & rear quad piston disc brakes with drilled rotors
-  backlit gauges and optional GPS integration
-  HID headlights
-  twist and go throttle
-  personal storage compartment
-  high visibility radial taillights
-  3,600in³ of lockable storage space

neon

lights up the road. the most versatile vehicle in its class. neon combines the agility to navigate the city with a top speed of 50 mph and a 50 mile range to enjoy a weekend escape. and thanks to our ultra-efficient LiFe PO₄ battery, recharging is easy. go from 0 to 100% charge in under 3 hours. upgrade to neon xr and get all the features of the neon with double the range capability – an impressive 100 miles on a single charge.

	neon	neon xr
price	\$3,900 *	\$5,400 *

-  front dual piston disc brakes with drilled rotors
-  HID headlights
-  brushed chrome nameplate
-  backlit gauges
-  retractable steel footpegs
-  lockable storage space and grab rail
-  high visibility radial taillights, twist and go throttle

charging is easy, all you need is an outlet.

evolve comes standard with a power cord that works with any wall socket. it also works with charging stations for charging on the road. open the seat, pull out the cord, plug in anywhere.

go from 0 to 100% in as little as 2.5 hours.

only have a few minutes? no problem. our lithium ion Life PO₄ batteries make it easy – it's the same technology that powers your cell phone and laptop. you know the drill. plug in just long enough to get you where you're going.

how far can you get on a full charge?

evolve vehicles offer ranges from 40 miles for helium to 120 miles for helium xr. how far will that take you? pretty far in most major cities.

let's look at it another way.
on a busy day a single
charge could take you to
all 5 boroughs in nyc.

and on your xr, you could
do it twice.

our mobile network

evolve is more than just a vehicle. it's a mobile community. we designed our app to help you connect on the road.

share your experiences

upload your photos, videos and updates all from the same page.

find friends

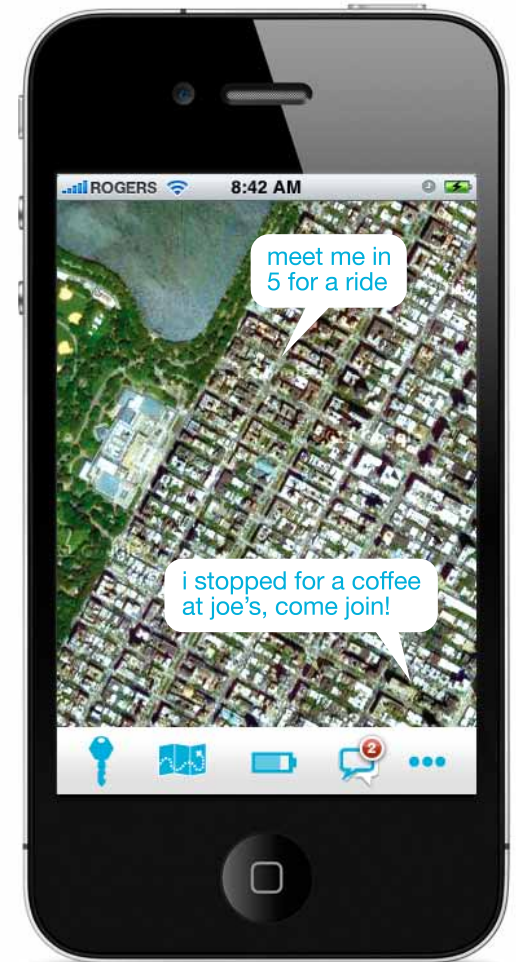

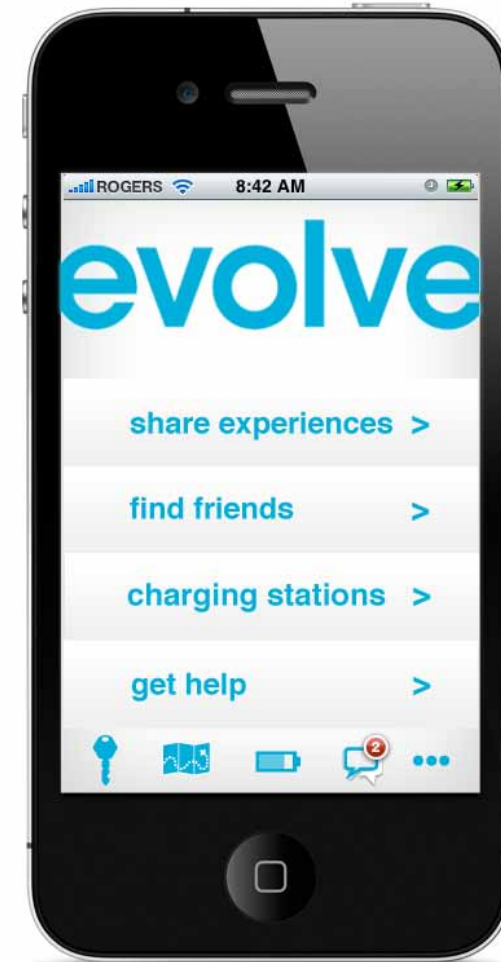

connect with other evolve riders. find their location and chat via direct message.

locate charging stations

in addition to real time gps directions on the road, find charging stations closest to your current location.

get help

use the emergency tab to contact allstate insurance's 24/7 roadside support.

a new kind of vehicle. using a new technology. we're sure you have a few questions.

if your question isn't answered here, call. text. email. anytime. evolve is here to help.

what if i don't have time to charge to 100%?

no problem. charge for as long as you can. even 5 minutes can give you enough juice to get you where you're going. evolve uses lithium ion batteries, more specifically LiFe PO₄ batteries, the same charging technology you already use every day with your cell phone. charging to 100% keeps you on the road longer, but if you don't have time, you won't hurt the battery. a few minutes can make a big difference.

will my dealer be able to service my evolve?

yes. in fact service has never been so simple. evolve offers a completely different maintenance experience. combustion engines have over 1,000 moving parts. evolve motors have 2. should you encounter a problem, all parts pop in and out (changing the motor is as easy as swapping out the back tire). and of course, all maintenance and parts are free of charge under the evolve 1 year warranty.

what if my battery dies while i'm on the road?

ride safe knowing evolve comes with a complimentary allstate insurance roadside package for 1 year. talk live with a representative 24/7 and they'll dispatch a crew to get you on your way. to help you stay charged we've also developed a free app that makes finding a charging station easy.

do i need an engineering degree to keep my motorcycle running?

our energy management system uses cutting-edge technologies to monitor each cell's health and temperature. battery balancers make sure every pack charges evenly, ensuring you don't have to think about anything but enjoying the ride.

how can i connect with other riders and share my experience?

the evolve app is the first ever truly mobile network. record your ride, upload photos and video from the road. find and talk to other evolve riders, locate the closest charging stations and keep an eye on bike performance.

what makes evolve different?

every evolve motorcycle is built in our NYC manufacturing facility by our dedicated evolve team. we believe evolve is more than just a vehicle, it's a lifestyle. we've traveled the world and come from a diverse background in fashion, music, art, technology, and that experience is the heart and soul of evolve.

this all sounds good, but...why electric?

traditional motorcycles are great but changing gears in traffic is a pain. not to mention they also pollute more than cars. riding an evolve provides the thrill of a clean, whisper-quiet machine with a no-gear, twist and go throttle. and the best part? operating costs are only about a penny a mile and every evolve is eligible for a 10% tax rebate*.

* as with all tax matters, this information does not constitute tax advice. please consult your tax advisor, attorney, or accountant for specific details on how to claim these tax benefits. the irs will be providing final forms and instructions for these new tax incentives at [irs.gov](https://www.irs.gov).

3 models 3 reasons to ride.

where the latest technologies meet prices you can afford.
