Renault Kangoo Z.E. wins the Green Award at the What Van? Awards 2018

- All-electric Renault Kangoo Z.E. takes the Green Award at the What Van? Awards 2018
- NEDC range of 170 miles opens up efficiency and financial gains to increasing numbers of business users
- Game-changing, real-world range of 124 miles contributes to victory for latest Kangoo Z.E 33
- Renault Kangoo Z.E. available in a variety of body styles, including Van, Maxi and Crew Van
- Supported by the specialised, business-focused Renault Pro+ dealer network
- Priced from £14,195 plus VAT (after Plug-in Van Grant)

The 100% electric Renault Kangoo Z.E. has underlined its class-leading efficiency and environmental compatibility by winning the coveted Green Award at the What Van? Awards 2018, held today 13th December at the Brewery, London.

Updated in September 2017 with significant improvements to range and charging, the Kangoo Van Z.E. eclipsed the competition by impressing the leading LCV title and website's judging panel with its unrivalled real-world range and usability.

The latest Kangoo Van Z.E.33 offers an official NEDC (New European Driving Cycle) range of 170 miles, which represents an increase of over 60 per cent on the previous model and equates to a real-world range of 124 miles.

James Dallas, What Van? Editor said: "Renault, which has long led the way in demonstrating the environmental, economical and practical advantages of electric vans to light commercial vehicle operators, has once more raised the bar with the Kangoo Z.E.33, which now has a real-world range of 124 miles on a single battery charge – a 60 per cent increase compared to its predecessor."

On the success of the Kangoo Van Z.E.33 in the annual awards, Vincent Tourette, Managing Director, Groupe Renault UK, said: "With interest in fully electric vehicles at an all-time high and more business users attracted to the significant benefits they offer, we are delighted to see the Renault Kangoo Van Z.E.33 win an award that officially recognises its status as the best and most forward-thinking electric LCV in the market."

"Renault is European leader in electric cars and vans and with this revised Kangoo Van Z.E.33 offers customers a relaxing-to-drive van that has instant pulling power together with ultra-low running costs and the same generous load capacity and options as the equivalent diesel version. Now with improved charging times and nearly 60 per cent more range Kangoo Van Z.E.33 is an even better business choice."

Making a significant contribution to the class-leading range of the latest Kangoo Van Z.E.33 is a new, higher density 33kWh battery, which although having significantly more storage capacity than the previous battery, is physically the same size. While ensuring the van can travel a longer distance between charges, the compact dimensions of the advanced battery also mean there is little impact on the available payload of up to 640kgs.

Together with the enhanced battery, the Kangoo Van Z.E.33 benefits from a new, more efficient, motor based on the R60, 44Kw (60hp) version that powers the game-changing ZOE Z.E.40.

The Renault Kangoo Van Z.E.33 is available in a range of body styles, including Kangoo Van Z.E.33, Kangoo Maxi Z.E.33, Kangoo Maxi Crew Van Z.E.33 and Kangoo Maxi Crew Van Cab Z.E.33. As well as improved range, the Kangoo Van Z.E.33 benefits from improved charging capabilities – charging from 0 to 100 per cent in six hours, compared to eight hours (for a lower range) on the previous version – all thanks to a new 32 amp charger. The Kangoo Van Z.E.33 is priced from £14,195 +VAT (inc Plug-in Van Grant).

The Kangoo Van Z.E.33, together with the rest of the award-winning Renault LCV range, is supported by the Renault Pro+ dealer network, which has been developed to meet the specific requirements of business customers. Benefits of the highly specialised network include finance products tailored for professional customers, extended opening hours and courtesy vehicles that are of the same category (wherever possible), to a dedicated after sales contact.

Renault is Europe's leading electric vehicle manufacturer — for both cars and vans — and offers a line-up of electric vehicles including the multiple award-winning ZOE supermini, with its enhanced 250-mile NEDC range, the Twizy urban quadricycle and the Kangoo Van Z.E. The Master Z.E. — an all-electric version of Renault's large panel van — will join the line-up in 2018.

ENDS

About Groupe Renault

Groupe Renault has been making cars since 1898. Today it is an international multi-brand group, selling close to 3.5 million vehicles in 127 countries in 2016, with 36 manufacturing sites, 12,700 points of sales and employing more than 120,000 people. To meet the major technological challenges of the future and continue its strategy of profitable growth, the Group is harnessing its international growth and the complementary fit of its five brands, Renault, Dacia, Renault Samsung Motors, Alpine and LADA, together with electric vehicles and the unique Alliance with Nissan and Mitsubishi. With a new team in Formula 1 and a strong commitment to Formula E, Renault sees motorsport as a vector of innovation and brand awareness.

In the UK, Groupe Renault UK has nearly 160 dealers selling the range of Renault cars, LCVs and Dacia. Groupe Renault UK sales continue to outgrow the UK vehicle market and, in 2016, sales totalled 137,506 vehicles — up 8 per cent on 2015.
